Node.js
Express
REACT
Bootstrap
JQuery
Handlebars
Spring Boot

DATABASES

MySQL/Sequelize
MongoDB/Mongoose

SUMMARY

Full stack developer with a knowledge base in MERN. Very passionate in learning new technologies and incorporating them into an ever expanding list of applications. Eager to utilize both creativity and efficiency to tackle new challenges.

PROJECTS

Groovehub Remixed

June 2023 to Present

As the project leader, I was tasked with overseeing the entire workflow of the application. My personal contributions included UI/UX design as well as some back to front routing functionality. As a group, we worked together to turn my initial proposed idea into reality in this second iteration music app.

Website: <https://groovehub-remixed-2f12da1632a2.herokuapp.com/>

Tech utilized: React, Spotify API, MongoDB/Mongoose, GraphQL/Apollo, Google Firebase, NodeJS

Musicify

September 2023 to Present

This music driven personal passion project contains many resemblances to Spotify, a popular music streaming service. Fully equipped with subscription services, this application allows users to upload and listen to their favorite music as well as browse other songs shared by users.

Website: <https://musicify-175f0766b215.herokuapp.com/>

Tech utilized: Next.js, React, Stripe, Supabase/PostgreSQL, Tailwind CSS
